VITALNEX

Health. Humanity. High-Tech.

CLINICAL RISK ASSESSMENT REPORT

Patient ID:	**demo-user**	Assessment ID:	**asm-de1698eb**
Assessment Date:	**2026-10-06 05:08:10**	Language:	**EN**
Assessment Mode:	**Demo**		

RISK SUMMARY

Risk Score	Risk Band	95% Confidence Interval	Calibration
29.3%	**Low**	**[24.8% – 33.8%]**	**Calibrated (Platt Isotonic)**

Human Review: Routine automated screening — no urgent flags.

PATIENT PARAMETERS

Parameter	Value
Age (years)	52
Sex (0=F, 1=M)	1
BMI	24.9
Smoking (0=No, 1=Yes)	0
Family History	0
Diabetes	0
Hypertension	1
Chest Pain Type	4
Resting BP (mmHg)	132.0
Cholesterol (mg/dL)	181.0
Fasting Blood Sugar >120	0
Resting ECG	0
Max Heart Rate	195.0
Exercise Angina	0
ST Depression	0.0
ST Slope	1
Major Vessels	0

Thal Type	3

EXPLAINABILITY

Feature-level attribution was not available for this assessment.

MODEL INFORMATION

Model Version	gradient_boosting
Model Source	Trained ML Artifact
Training Data	Pune Clinical Risk Synthetic Dataset (20,000 records)
Synthetic Data Notice	Dataset is synthetically generated for academic research.

DATA QUALITY

Completeness	100.0%
Quality Score	100.0
Missing Fields	0
Outlier Status	Within Clinical Parameters

TRUST & GOVERNANCE

Explainability Method	Not Available
Calibration	Platt Isotonic Scaling
Confidence Score	0.91
Brier Score	0.082
Fairness (Demographic Parity)	0.93
Uncertainty (Total Entropy)	0.12
Safety Boundary Check	100% of inputs within verified clinical physiological parameters.
Human Review Status	Not_Required

Known Limitations:

• Synthetic academic research dataset — not real patient records.
• Non-diagnostic screening tool. Professional clinical review required.
• Model calibrated on Pune regional synthetic population.
• This system does not replace qualified healthcare professionals.

VITALNEX DECISION ROUTING

Decision routing used deterministic rules (Jev integration not configured).
Decision routing is an application workflow aid and does not constitute medical diagnosis or treatment.

CARE GUIDANCE

Routine screening results. Continue maintaining a healthy lifestyle with regular physical activity, balanced nutrition, and periodic health check-ups. Consult your healthcare provider for personalized guidance.

MEDICAL DISCLAIMER

- *VITALNEX is an academic research and clinical decision-support prototype.*
- *It is not a diagnostic system. It does not prescribe medication.*
- *It does not replace a qualified healthcare professional.*
- *The underlying research dataset is synthetic and does not establish clinical validity.*
- *In case of acute or emergency symptoms, immediately call 108 / 112 (India).*
